

Method	#	Test Description	Sample Input Data	Expected Output	Actual Output	Pass / Fail
calculateTotal	1	Computes a positive value for all denominations.	hund = 4 ten = 2	420.0	420.0	Pass
	2	Computes a negative value for all denominations.	thousand = -33550 hund = -3 ten = -3 one = -6	-33550336.00	-3.3550336E7 (Same mathematical value)	Pass
	3	Inputs both positive and negative values.	fifty = 1 twenty = 1 one = -3	67.0	67.0	Pass
dispense	1	Dispenses item while the slot still has the item stocked.	slot.count = 10 item = new Item("Ube Halaya", 95)	returns item	slot.dispense() == null results to false	Pass
	2	Dispenses item when it is out of stock in the slot.	slot.count = 0 item = new Item("Ube Halaya", 95)	returns null item	slot.dispense() == null results to true	Pass
transact	1	Performs a transaction where payment is equal to price; no change is expected.	payment.total = 25.00 price = 25.00	Change Dispensed: 0.00	Change Dispensed: 0.00	Pass
	2	Performs a transaction where payment is greater than the price; change must be dispensed.	payment.total = 50.00 price = 25.00	Change Dispensed: 25.00	Change Dispensed: 25.00	Pass
	3	Performs a transaction where payment is less than the price; a transaction must not be made.	payment.total = 10.00 price = 25.00	Not enough money inserted! Your payment is returned.	Not enough money inserted! Your payment is returned.	Pass
restock	1	Restocks an item with a positive count.	numItems = 10 slot.count = 10	slot.count = 20	slot.count = 20	Pass
	2	Restocks an item with a negative count. <i>This scenario is normally impossible to reach in the program.</i>	numItems = -1 slot.count = 10	slot.count = 10	slot.count = 10	Pass
	3	Restocks an item with a count of zero. <i>This scenario is normally impossible to reach in the program.</i>	numItems = 0 slot.count = 10	slot.count = 10	slot.count = 10	Pass
replenish(denom : float)	1	Replenishes a denomination that is considered legal in the program.	denom = 500	total 500 bills = 50 (max) "500.00 bills replenished!"	total 500 bills = 50 (max) "500.00 bills replenished!"	Pass
	2	Replenishes a denominatoin not allowed by the vending machine. <i>This scenario is normally impossible to reach in the program.</i>	denom = 200	total 200 bills = 0 (there is no 200 denomination) "200.00 bills replenished!"	total 200 bills = 0 (there is no 200 denomination) "200.00 bills replenished!"	Pass
isValidSlot	1	The slot chosen is within the number of slots in the vending machine.	choice = 2	TRUE	TRUE	Pass
	2	The slot chosen is not within the number of slots in the vending machine.	choice = -1	FALSE	FALSE	Pass

printSummary	1	Prints the summary of items sold when items have already been dispensed by the vending machine.	item1.sold = 2 item1.price = 10.00 item2.sold ... item8.sold = 0	Ice cup: 2 sold Total amount collected: Php 20.00	Ice cup: 2 sold Total amount collected: Php 20.00	Pass
	2	Prints the summary of items sold when there are no items sold by the vending machine yet.	item1.sold ... item8.sold = 0	Total amount collected: Php 0.00	Total amount collected: Php 0.00	Pass
